USER MANUAL

1. Product characteristic

- 1) The design of charge mode is "constant flow", which is charging for the constant flow when storage battery voltage is lower than preset value. When the storage battery voltage is higher than preset value, charging current will be decreased as the battery voltage increases.
- 2) High working efficiency, protect battery better.
- 3) Perfect protection function: avoid over charge, avoid over flow, greatly reduce the heating from the invalid charging battery.
- 4) Metal paint process case, convenient installation and operation.

2. Safety instructions

- ◆ Follow all instructions in this instruction manual.
- ◆ Do not place the product near any heat sources such as radiators, stoves, or other devices that product heat. If you are not going to use the product for a long time, pull out the battery. Do not throw or drop the product in case it causes severe damages.
- ◆ Be aware of the supply voltage. Only the supply voltage listed on the instruction manual fits the product.
- ◆ Only use accessories specified by our company.
- ◆ Never open the device. If devices are opened by customers in breach of this instruction, the warranty becomes null and void. Turn to the professional mechanic or local dealer for help if there is something wrong with the product.
- ◆ If components are needed to be replaced, replace them with original components produced by our company.
- ◆ Leave the devices the minimum space of 30 mm for proper ventilation. Do not cover the vent with newspapers, cloths, curtains, etc. Do not place the devices near fire or water. Only professional mechanic can assemble the devices if it is labeled with hazard warning sign “⚡”. Recycle the replaced battery. The devices can be used in tropical or temperate regions. The devices can only be used in the area with an altitude of below 2,000 meters.

3. Operation, function and diagram

1) The scope of application

Designed with 10 output charge ports, can support 10 units to charge the lithium battery simultaneously.

2) Function description

The front panel of the charger

The back panel of the charger

- ① power switch
- ② power indicated lamp
- ③ USB charging port
- ④ DC power socket

3) operation steps

Use USB line connect with the USB port which is in the back of the meeting base and USB port in front of the charger;

The charger is connected to the power supply, turn on the power switch, the power light is on. Light ring will flash when charging;

when the battery indicator light stops flashing it means that charging is complete;

4. Product parameters

- Input voltage : AC 100-240V 50Hz/60Hz
- USB tol output : 5V/10A
- Output per road : Max 5V 10A
Min 5V 1A
- Output tol Power : 50W
- Power per road : Max 50W
Min 5W
- Power : 50W
