

DCU-10P

10-CHANNELS USB POWER CHARGER

DCU-10P is 10-channel USB Power charger battery of 2.4G Wireless digital conference system. Used for wireless chairman discussion unit (DCW-9900C) and wireless delegate discussion unit (DCW-9900D).

DCW-9900 Series is 2.4G Wireless digital conference system, This series includes Wireless digital controller Unit (DCW-9900M), Wireless digital chairman unit (DCW-9900C) and Wireless digital delegate unit (DCW-9900D). This series combined video-tracking system, supports HD camera and SD camera and support up to 255 units.

FEATURE

- USB Power Charger 10 port.
- Used Charger battery for chairman unit (DCW-9900C) and delegate unit (DCW-9900D).
- The design of charging mode is "constant flow pattern", which is charging for the constant flow when storage battery voltage is lower than preset value. When the storage battery voltage is higher than preset value, charging current will be decreased as the battery voltage increases.
- High working efficiency, protect battery better.
- Perfect protection function: avoid over charge, avoid over flow, greatly reduce the heating from the invalid charging battery.
- Metal paint process case, convenient installation and operation.

SPECIFICATIONS

Input voltage	AC 100-240V 50Hz/60Hz
USB total output	5V/10A
Output per road	Max 5V 10A Min 5V 1A
Output total Power	50W
Power per road	Max 50W Min 5W
Power	50W

Controls and Indicators

On front

- Power on/off switch.
- 10 x Charging the battery pack connector USB.

Controls and Indicators

On rear

- 1 x AC input.
